

Broward Avian and Exotic Animal Hospital is a dynamic Avian and Exotic exclusive practice serving all of South Florida. We are seeking a veterinarian with avian and exotics experience to join our four doctor team. We are fortunate to have a very large client base who demand advanced medicine and diagnostics. We have state of the art in house laboratory, digital radiography, ultrasound, endoscopy, laser therapy intensive care units as well as access to a mobile CT team. Our surgery suite includes advanced monitoring and anesthesia equipment. And we perform dental procedures on everything from mice to pot bellied pigs. We strive to provide the highest quality of care for our patients while maintaining a close and professional relationship with our clients. We have a very heavy case load and it is important that we maintain a good work/life balance for our entire team. We all enjoy working in a supportive environment while nurturing individual interests and life goals. The ideal candidate would have a minimum of two years experience with avian and exotic species, be energetic, enthusiastic and have excellent interpersonal skills. You must possess a sense of humor and be a contributing member of our existing team. We enjoy mentoring an intern each year, hired through the VIRMP match, and teaching and learning on a daily basis is part of our culture. We offer a competitive salary, benefits, CE allowance and license package.

Deerfield Beach is part of a very diverse community offering beach life, boating life and is part of a multicultural melting pot. We have communities that still offer that small town feel, equestrian and farm country, or urban modern life. Our tropical climate allows you to enjoy outdoor activities year round, and provides the ideal climate for a vast number of species we see as patients daily.
