

Boarded (or Board-eligible) DVM for 100% Avian/Exotic Practice

ABVP- avian, exotic mammal or reptile/amphibian, or ACZM (ZCA)

Extra consideration for someone interested in reptiles/amphibians and avian/exotic surgery

Texas Avian & Exotic Hospital is located between Dallas and Fort Worth and is part of a large referral hospital. Our hospital practices highest quality medicine and surgery backed with the diagnostic technology needed to support this, including our own CT. We collaborate daily with on-site specialists including surgery, dentistry, internal medicine, cardiology, dermatology and ophthalmology. We also focus on education with residencies, internships, externships, academic rounds and conference participation.

All emergencies are covered by a large and experienced ER in the building next door. No on-calls!

We currently have three avian boarded specialists (Thielen, Hoppes and Antinoff), an exotic mammal resident and an intern.
